Each state regulates advance directives differently. STATE laws regarding Advanced Directives are found in Pennsylvania Statutes 20 Pa. CSA chapter 54. Advance Directives are documents which indicate your health care wishes in the event that you are not capable of making your own decisions. Advance directives are not used for decision making if the patient is able to make the decision. Pennsylvania recognizes two types of advance directives: durable power of attorney; and living wills.*

*You have the right to informed decision making regarding your care, including information regarding Advance Directives and this facility's policy on Advance Directives. Applicable state forms will also be provided upon request. A member of our staff will be discussing Advance Directives*

## PATIENT RIGHTS & NOTIFICATION OF OWNERSHIP

*with the patient (and/or patient's representative or surrogate) prior to the procedure being performed.*

The Endoscopy Center respects the right of patients to make informed decisions regarding their care. The Center has adopted the position that an ambulatory surgery center setting is not the most appropriate setting for end of life decisions. Therefore, it is the policy of this surgery center that in the absence of an applicable properly executed Advance Directive, if there is deterioration in the patient's condition during treatment at the surgery center, the personnel at the center will initiate resuscitative or other stabilizing measures. The patient will be transferred to an acute care hospital, where further treatment decisions will be made.

If the patient has Advance Directives which have been provided to the surgery center that impact resuscitative measures being taken, we will discuss the treatment plan with the patient and his/her physician to determine the appropriate course of action to be taken regarding the patient's care.

### **Complaints/Grievances:**

If you have a problem or complaint, please speak to one of our staff to address your concern. If necessary, your problem will be advanced to center management for resolution.
